## EDUCATION

---

### Indian Institute of Information Technology, Bhopal

Bhopal, India

*Bachelor of Technology in Electronics and Communication Engineering (CGPA 8.93/10)*

*August 2019 – May 2023*

## EXPERIENCE

---

### Full Stack Developer (Consultant)

July 2023 – Present

*AST LLC*

*Remote*

- Maintained and developed the TaaS team's web portal using Spring Boot and React.
- Lead the frontend upgrade for the web portal, updating legacy codebase to use modern React 18+ features such as Functional Components, Hooks etc.
- Streamlined the complex project onboarding process by developing a web-based wizard, saving hundreds of manual hours.
- Implemented functionality to publish and lock a Test Run in real-time from the Web Portal, significantly reducing the time and efforts of the support team.

### Full Stack Developer

January 2023 – July 2023

*D-WebBox*

*Mumbai, India*

- Lead the frontend for the FOR ALL COMMUNITY application for Great Place To Work®, built entirely from scratch for Android and iOS platforms.
- Built entire backend system for Prelux Asian Paints from scratch, a feature complete dashboard system for management of contractor meets and events.
- Implemented complex peer scoring mechanism logic at scale for GenWE application.
- Performed code reviews and enhanced the performance of several React Native applications.

### React Native Intern

June 2022 – January 2023

*D-WebBox*

*Remote*

- Improved iOS specific features and UX of FIKAA, an application built for investing in the stock market.
- Built Amyraa application from scratch, a cross-platform E-commerce app built for a jewellery retail and reseller store.
- Helped fix iOS specific bugs in the Great Managers League (GML) app, leading to successful launch of the application.

### Frontend Development Intern

October 2021 – June 2022

*TravOkarma*

*Remote*

- Improved the performance of the User and Creator dashboard section by optimising Network calls and refactoring UI code.
- Added Custom Shimmer loaders to the entire application, improved UI/UX and transitions.
- Implemented several features such as Profile and Blogs section on the app from scratch.

### Software Development Intern

October 2020 – October 2021

*Remassis*

*Remote*

- Developed a cross-platform iOS/Android Online Consultation App in React Native
- Developed and maintained complex back-end systems and microservices in Express/Node.js, GraphQL and MySQL.
- Implemented real-time features of the app such as video call using WebRTC, Notification system using FCM.

## OPEN SOURCE

---

**Ancient Beast:** Open Source Turn Based Strategy Game built on JavaScript.

- Made several contributions to the core features of the game.
- Made styling contributions and resolved visual bugs using Less/CSS.

**twenty:** A modern alternative to Salesforce, powered by the community. Built using NestJS, React and TypeScript.

- Enhanced frontend side of the application, improving user experience and overall visual appeal.
- Added support for all composite fields in the Excel import wizard.

## PROJECTS

---

**School ERP for JMRD, Datia:** A full fledged School ERP System, complete with Attendance System, Admin functionality, Notice Board and a Doubts Section. Built on React Native/Node.js/MongoDB.

**MovieFinder:** iOS app built in Swift and SwiftUI that retrieves movie information from the OMDb API and features an offline watchlist.

**GuessTheFlag:** A simple flag guessing game, built from scratch using Swift and SwiftUI for iOS platform.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, Java, Python, HTML/CSS, Swift

**Frameworks:** React, React Native, Spring Boot, Node.js, Flask, SwiftUI

**Developer Tools:** Git, Docker, AWS, VS Code, Eclipse, Xcode, Vim
